15 Years

AUPP has been the preferred pathway to Australian and New Zealand universities for 15 years

Leading pathway provider in South East Asia

Enrol at top-ranked universities

Consistently ranked highly for teaching quality

The AUPP program is a recognised pathway for obtaining your first international degree and global career opportunities.

Dr Manish Malhotra

Chairman and Founder

From the Chairman's desk

Congratulations and thank you for putting your trust in the Abroad Unified Pathway Program (AUPP).

AUPP will be here to support you through the life-changing journey on which you are about to embark. We are here to ensure you take full advantage of the experiences and opportunities available to you.

The primary goal of AUPP is to harness and develop your transferable career and study skills to give you the best opportunity of succeeding at university in Australia or New Zealand. Our aim is to equip you with the knowledge, confidence and perseverance needed to graduate and successfully enter the work force. We provide mentoring to shape you into a productive and professional member of the workforce and greater society.

Together with our highly qualified and experienced faculty, AUPP looks forward to imparting academic excellence through our value-based education program. We are here to provide you with the environment needed for your academic and professional development. We want to ensure you feel at home in the secure and supportive environments of Australia and New Zealand.

Our core belief is that education develops the career and life skills needed to engage with, and contribute to, a productive society. We also believe that education is vital in promoting the importance of high ethical standards and an individual's sense of self-worth.

We look forward to playing a fundamental role in your life as we plan your educational and professional goals.

Wishing you all the best,

Dr Manish Malhotra,
Chairman and Founder,
ATMC Education Group
Abroad United Pathway Program (AUPP)

The AUPP
Credit Transfer Program

Your pathway to international success

Studying abroad with a view to working internationally are popular career pathways for many young people. Some students, however, will postpone plans for overseas study due to:

- an absence of clear guidelines and up-to-date information
- concerns about English language proficiency
- the perceived high cost of studying abroad
- a lack of immediate finances required to secure a student visa.

AUPP has proven strategies to help tackle these challenges

Feeling confident in speaking and understanding English is an important part of readying students to learn and work internationally.

The first year of AUPP allocates time and resources to developing students' English comprehension and conversational skills. At the end of the first year, students undertake the International English Language Testing System (IELTS) test, with the aim of securing a score to qualify for admission into the second year of an Australian university program.

Additionally, studying with AUPP gives students an extra year to save the funds to meet the financial requirements for securing a student visa.

The process of securing a visa and a letter of offer can take some months. With AUPP, students can study and prepare for an overseas education while their visa and passport applications are being processed.

Once students receive a Confirmation of Enrolment (CoE) from ATMC University Partners they can apply for a Student Visa.

Academic Partner

AUPP works in association with the Australian Technical and Management College (ATMC) to provide education pathways to Australia.

ATMC is a nationally recognised educational institute collaborating with regional university partners to deliver programs at campuses in Sydney, Melbourne and Auckland. Through university partners including Federation University, Western Sydney University and the Nelson Marlborough Institute of Technology, ATMC offers a range of undergraduate and post-graduate programs in information technology, health, management and accounting that are designed to prepare students for the global workforce.

ATMC campuses are located in some of the most liveable and culturally diverse cities in the world, guaranteeing students an unforgettable international study experience. The campuses provide a quality learning environment and are conveniently located in central business districts, close to public transport hubs, accommodation options and major employers.

ATMC has an extensive student support program to help students settle in to living and learning in a new city. The Student Services team is available 24/7 to answer queries from students on everything from course information to student health and well-being. There are a range of supervised online and social activities to help students make friends and experience the best of local lifestyles and attractions.

ATMC also supports students to find work through a series of employment seminars and practical workshops on topics including interview technique, resumé preparation and professional networking.

ATMC faculty consistes of experienced academics who oversee the academic quality and integrity of programs delivered on behalf of university partners, as well as the vocational and English programs offered at all ATMC campuses.

ATMC faculty regularly review and respond to student evaluations of courses, services and teaching.

About AUPP

Fast track your entry to an international university program

The Aupp program grants students Internationally recognized Diploma qualification from ATMC which can be used for upto 1 year of credit transfer in to ATMC partner Universities programs in Australia and New Zealand.

The 10-month program provides a supportive structure for students to gain the academic qualifications, English proficiency and life skills needed to successfully pursue international study pathways.

AUPP supports students on their journey and works with them to define their education and professional goals.

AUPP Vision

- To support students to realise their dreams of an international education by improving accessibility to program pathways

- To increase global employment opportunities for students by delivering career-orientated, practical education programs.

I arrived in Australia in July 2018. The main reason I chose to study here was the quality of Australia's education system. I based myself in Sydney because I had heard about the city's bustling lifestyle. Having now experienced and enjoyed Sydney for myself, I believe it to be among the top study destinations for overseas students.

My experience with AUPP has been great. Through this program, I completed my Diploma in Information and Technology in my home country. As a result, I have seen great improvements in my communications and technological skills, which are now helping me to become familiar with company culture in Australia.

I did not have any issues adjusting to life in Australia. The Australian climate is similar to India's and very comfortable. The teaching and learning methods available in Australia are ultra-modern, which means students find studying interesting and enjoyable.

Just as important as hard work is the ability to relax and unwind from your studies. Sydney is the perfect destination for this, with famous spots such as the Sydney Opera House and Darling Harbour - as well as the city's many beaches - waiting for you explore and enjoy. There is more to academic success than burying your head in your books. I believe students only truly thrive in their studies when they are enjoying them.

Meet Patel
Information Technology student

The Concept

First year pathway program at home	Remaining two years of bachelor degree in Australia or New Zealand	Post-Study Work Visa for Australia and New Zealand

AUPP's skills transfer program is offered through dedicated centres located across India and the Subcontinent. AUPP provides career-oriented education through best of curriculum facilities and technology.

A unique Block Skills Transfer program - focused on information technology, information systems, business studies and accounting – gives students the opportunity to study for 10 months locally before completing their remaining two years of study in Australia/New Zealand.

After the initial 10 months of local study, the student becomes eligible to apply for credit transfers to secure admission directly into the second year of an Australian or New Zealand bachelor degree.

AUPP students, post completing their course, will have access to ATMC's prestigious partner universities, offering industry-leading programs and prepare students for significant employment opportunities post study.

After completing a bachelor degree from an Australian or New Zealand university, students may be eligible for a two-year Post-Study Work Visa in Australia and a three-year Post-Study Open Work Visa in New Zealand.

Graduating students may also apply for Permanent Residency (PR), subject to prevailing local regulations.

Focus on student education pathways and professional goals

Student-friendly learning management systems (LMS)

More than 2,500 students have graduated globally

Best pathway provider in South East Asia

Studying at AUPP

Infrastructure

Every AUPP centre classroom is equipped with computers and laptops and connected to the internet and intranet. Computers are installed with the software students need for study and a dedicated digital library of study materials and learning resources.

We believe studying is best carried out in smaller dedicated spaces rather than rooms filled with large numbers of students. Each AUPP classroom is air-conditioned with comfortable seating arrangements for 25-35 students.

Curriculum

AUPP'S curriculum is designed to meet the academic and comprehension abilities of international students while remaining on par with international education standards.

The curriculum is developed as per industry requirements and consists of assignments, group tasks, group discussions, as well as impromptu performances.

The curriculum adheres to CRICOS regulations and the education system is developed in accordance with the Australian Quality Training Framework.

Faculty

Students will find academic staff very accessible at AUPP centres and will enjoy receiving one-on-one assistance directly from their lecturer or tutor.

Faculty are selected not just for their academic achievements and subject knowledge, but also on their teaching methods. Care is taken to ensure all AUPP faculty deliver programs with enthusiasm and a commitment to excellence and student well-being.

Courses are delivered directly in local classrooms and through online courses conducted by international faculty based in Australia or New Zealand.

AUPP uses a unique LMS (Learning Management System) for delivering courses to students across the Subcontinent, ensuring high-quality course delivery and uniformity of teaching methodology.

The AUPP Advantage

Enjoy substantial financial savings on course fees and living expenses by completing the first year of your degree at home.

Lifestyle benefits

Enjoy learning and working in some of the world's most liveable cities.

Career opportunities

Learn in-demand skills that may lead to lucrative employment opportunities in information technology, information systems, management and accounting.

Leading universities

Apply for admission to a degree program with world-ranked universities through direct credit transfer.

Employ-

Opportunities to work for ethical employers in countries with a high minimum wage.

Time sav-

Study the first year of your program locally and receive support to prepare for the English competency exam and the next step of your education journey.
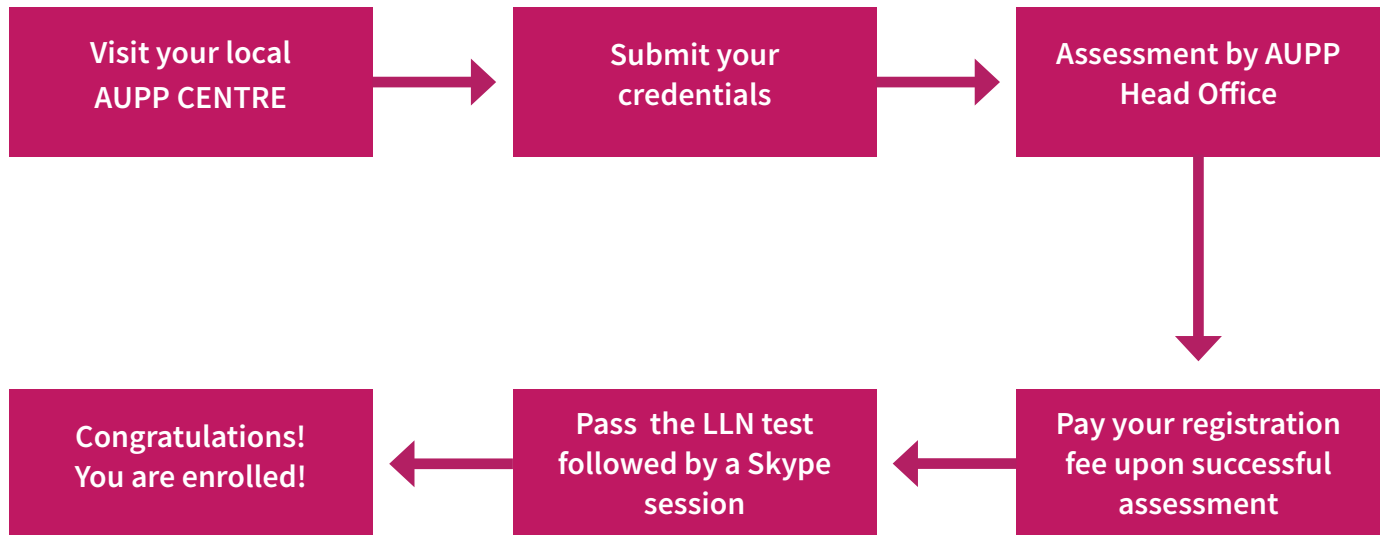

Receive assistance and guidance from trusted visa partners.

The AUPP Admission Process

The six steps to AUPP admission

The AUPP admissions process is very straightforward and you will receive support at every stage.

Visit your local AUPP CENTRE	Submit your credentials	Assessment by AUPP Head Office

Congratulations! You are enrolled!	Pass the LLN test followed by a Skype session	Pay your registration fee upon successful assessment

Course Information

Australia

- **Bachelor of Information Technology**
  (CRICOS No. 074009A)
  - Business Information Systems (CRICOS No. 092106F)
  - Mobile Application Development (CRICOS No. 092109C)
  - Networking & Security (CRICOS No. 092055A)
  - Software Development (CRICOS No. 092108D)

- **Bachelor of Business**
  (CRICOS No. 039579B)

Duration

Students study for 10 months at their local AUPP centre and complete the remainder of their two years of study with ATMC Academic Partner University, Federation University Australia. During the 10 months of local study, students must successfully complete the Australian International Pathway Program as per the requirements of Australian Government standards.

Study credits earned through local AUPP centres are transferred to the next year of study in Australia. These qualifications are delivered under the Higher Education category of the Australian education system.

Credits

Credits are gained for the successful completion of modules of study. For example, post successful completion of year 12 schooling with minimum precentage outlined in entry requirement and successful completion of AUPP pathway would grant up to 1 year of credit exemption in relevant Federation University bachelor degree.

How it works

Your credit score is carried into the next academic year. For example, you achieve a score to qualify for the 12th standard and wish to take up a Bachelor of Information Technology at Federation University. You will receive the following exemptions subject to meeting admission requirements.

Diploma Program	Pathway to university	Exemptions from first year in these programs
One year ATMC Diploma IT/Business	ATMC with Federation University	Bachelor of Information Technology (Non specified major specialisation) Bachelor of Business Finish your degree in two years

Courses

Advanced Computing

Course Overview

The Advanced Computing Diploma qualification is designed to prepare students for education in English speaking countries such as Australia.

Course units are designed in reference to an internationally recognised education system. Students receive recognition of prior learning/ credit on completion of these units providing pathways to study with leading universities in Australia

This course provides students with the skills and knowledge needed to develop competencies in software development, business information system, project management and to administer and manage information and communications technology (ICT) support in small-to-medium enterprises (SMEs) using a wide range of general ICT technologies.

Duration: 40 weeks

Entry Requirements

- Completion of Year 12 with high score or equivalent
- Satisfactory completion of the Language, Literacy and Numeracy Test

Average of best four academic subjects in Year 12 from

- CBSE and ICSE Boards: 60%
- State Boards (excluding Punjab & Haryana State Board): 65%
- Haryana and Punjab State Boards: 70%

Course structure

The international pathway qualification in Information Technology covers the following topics.

Unit Code	Unit Title
BSBWHS501	Ensure a safe workplace
BSBSUS501	Develop workplace policy and procedures for sustainability
BSBADM502	Manage meetings
BSBWOR501	Manage personal work priorities and professional development
ICTICT509	Gather data to identify business requirements
ICTICT517	Match ICT needs with the strategic direction of the organisations
ICTWEB411	Produce basic client-side script for dynamic web pages
ICTWEB429	Create a mark-up language document to specification
ICTWEB501	Build a dynamic website
ICTWEB502	Create dynamic web pages
ICTWEB503	Create web-based programs
ICTPRG425	Use structured query language
ICTSAS505	Review and update disaster recovery and contingency plans
ICTSAS506	Update ICT system operational procedures
ICTSAS511	Prioritise ICT change requests
ICTSAS502	Establish and maintain client user liaison
ICTICT501	Research and review hardware technology options for organisations
ICTNWK513	Manage system security
BSBCRT501	Originate and develop concepts
ICTPMG501	Manage ICT projects

Courses

Advanced Business Management

Course Overview

The Advanced Business Management Diploma qualification is designed to prepare students for studies in English-speaking countries. The course syllabus complies with international education standards and students who successfully complete the course receive a qualification that is recognised by the Australian higher education system.

The course is designed for students seeking a general knowledge base that incorporates theoretical concepts, as well as skills in some related business functions. Students are equipped to analyse and plan approaches to resolving problems on a range of managerial, technical and business projects

Duration: 40 weeks

Entry Requirements

- Completion of Year 12
- Satisfactory completion of the Language, Literacy and Numeracy Test

Average of best four academic subjects in Year 12 from

- CBSE and ICSE Boards: 60%
- State Boards (excluding Punjab & Haryana State Board): 65%
- Haryana and Punjab State Boards: 70%

Course structure

The international pathway qualification in Advanced Business Management covers the following topics.

Unit Code	Unit Title
BSBWHS501	Ensure a safe workplace
BSBSUS501	Develop workplace policy and procedures for sustainability

ICTWEB501	Build a dynamic website	BSBCRT501	Originate and develop concepts
ICTWEB502	Create dynamic web pages		
ICTWEB503	Create web-based programs	ICTPMG501	Manage ICT projects

AUPP Entry Requirements

Eligibility criteria

Any student who has successfully completed Class 12 is eligible to apply to the AUPP for Australia.

People with IT, Arts and Business Diplomas may also apply for the AUPP.

The English language requirements for all academic programs requires an International English Language Testing System (IELTS) overall band score of 6.0 with no individual band score less than 5.5 or equivalent.

Refund policy

If AUPP is unable to start a course on an agreed start date, the student will be refunded full pre-paid tuition fees.

- If the course has been cancelled by AUPP during a study period, student will be refunded for all pre-paid tuition fees.

- In the event the student fails to commence any course on agreed start date, there will be no refund of that course fee.

- If the student withdraws from a course on or after the commencement date, the total tuition fee is payable to AUPP and is nonrefundable.

- If any student's enrolment is cancelled by AUPP due to misconduct or unsatisfactory academic progress, all unpaid tuition fees are payable to AUPP and there will be no refund of any pre-paid tuition fees for current and subsequent courses.

- In the event AUPP cancels its offer based on fraudulent documents and/or misleading information provided by the student, the total of any unpaid tuition fees is payable to AUPP and is non-refundable. There will be no refund of pre-paid tuition fees for the initial and subsequent courses.

- All the fees are payable as per details given in the invoice.

AUPP reserves the right to amend the above terms and conditions at any time to ensure compliance with State and Federal laws and/or to amend the non-refundable enrolment fee.

Life in Australia

Australia has the world's highest proportion of migrant settlers in a developed country, with more than 25% of its citizens born overseas. Australia is renowned for its spectacular natural wonders, peaceful culture, a stable political system and love of sport! This region has so much to offer … and as an international student there is so much to learn.

Food in Australia

Australian food has been influenced by the cooking styles of the people who have arrived over the years. There is an emphasis on fresh, locally-sourced produce and you'll also find an abundance of local Indian, Asian and Middle-Eastern specialty grocers across metropolitan areas.

Historical influence

Aboriginal Australians arrived on the continent over 60,000 years ago and have one of the oldest continual civilisations on earth. Indigenous Australians have an oral culture with spiritual values based on respect for the land and a belief in the Dreamtime. Modern Australia was claimed for the British by Captain Cook in 1770. The First Fleet arrived in Sydney Harbour in 1788 to establish a penal colony that became the first European settlement in Australia.

Communication

For most international students, Australia are a long way from home. Staying in touch with loved ones is easier through the internet and phone. Depending on your country of origin, phone cards and mobile phone plans should allow you to communicate internationally at reasonable prices.

Finding a place to live

Finding a place to live when you arrive in Australia will be an important first step, especially if you are moving with your family. Our advice is to be prepared for the high cost of housing. Rent in capital cities tends to be expensive and the vacancy rate is currently low. Be sure you plan ahead and look into share housing options.

Culture

You will probably notice some lifestyle differences between Australia and your home country. For example:

- Australians are quite informal and will refer to their lecturers and tutors by their first names.
- They expect everyone to be treated equally. It is customary to thank shop assistants and other service staff when they assist you.
- Being punctual is very important. If you are going to be late for an appointment, it is polite to call ahead.

Living costs

Your living costs will vary according to factors such as your lifestyle and location. The Australian Government has provided the following guide as to what you might expect to spend on living expenses each week.

Groceries and eating out: AUD$140 to $280 per week
Gas and electricity: AUD$10 to $20 per week
Phone and internet: AUD$15 to $30 per week
Public transport: AUD$30 to $60 per week

Typically, the capital cities have the highest living costs, with the biggest cities – Sydney and Melbourne – usually being at the upper end of the spectrum and smaller cities such as Adelaide and Hobart being the cheapest.

Safety

Oceania is a diverse and multicultural region. You will find that locals welcome international students and celebrate the many cultures and countries from which they come. That said, as with other countries around the world, it is not free from crime and new arrivals should observe the same precautions as they would when travelling anywhere, whether at home or overseas.

21
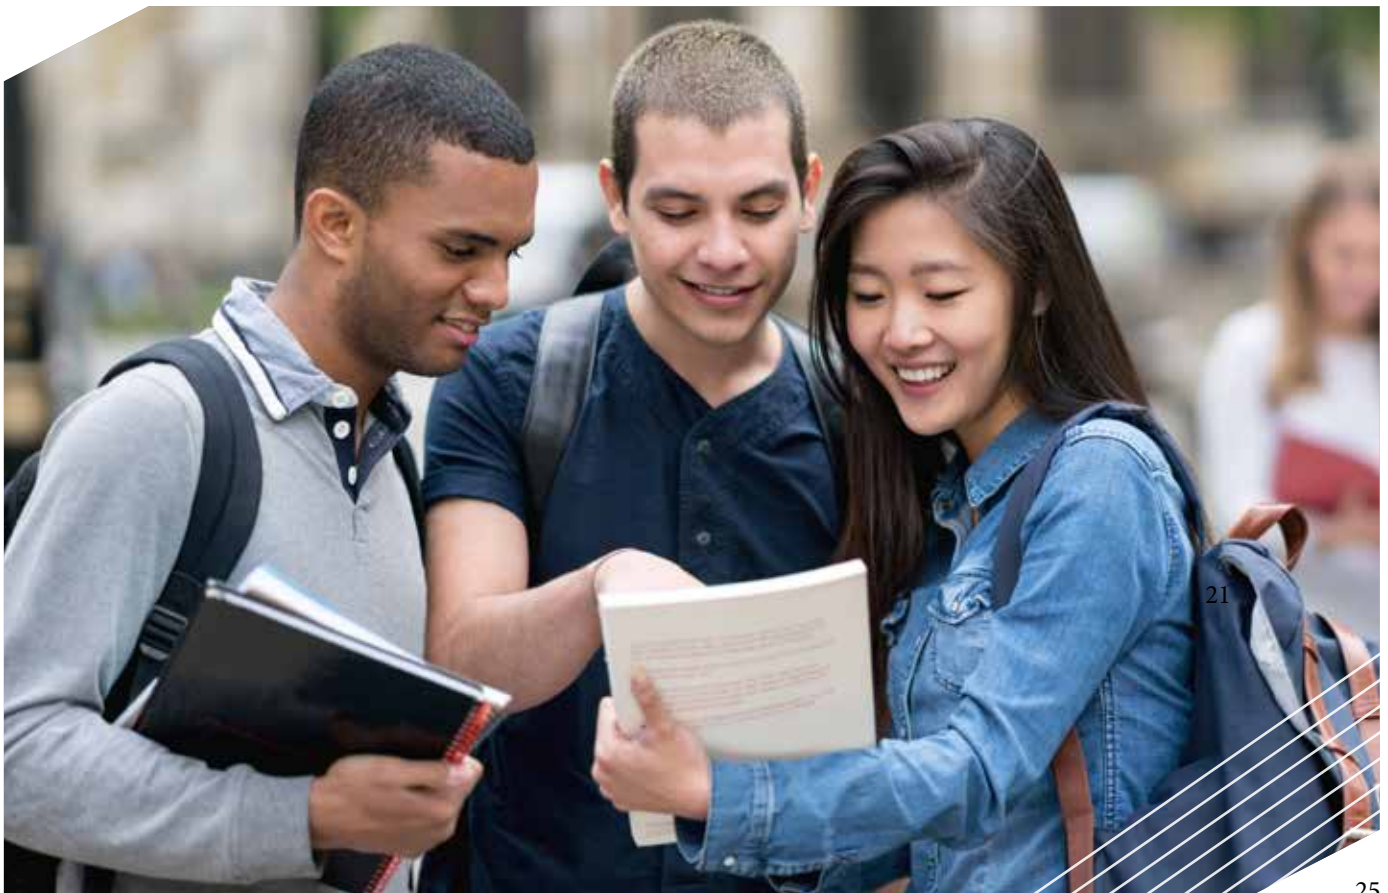

Job outlook in Australia

The Australian job landscape is changing as new technologies are introduced, businesses adapt to new ways of working, and the Australian Government and industry responds to challenges such as COVID-19.

There is likely to be demand in industries where employment has grown strongly in recent years, including:
- health care and social assistance
- professional, scientific and technical services
- education and training
- construction

Careers in Information Technology

The number of people working as software and applications programmers grew strongly from 121,300 in 2018 to a projected 146,800 by 2023. There are likely to be around 80,000 job openings over five years.

- **Location**

Software and applications programmers work in many parts of Australia. New South Wales and Victoria have a large number of workers.

- **Industries**

Most work is in the professional, scientific and technical services; financial and insurance services; and public administration and safety.

- **Earnings**

Full-time workers on an adult wage earn around $2,003 per week (higher than the average of $1,460). Earnings tend to be lower when starting out and become higher as the worker gains more experience.
Full-time
Most work full-time (90%, much higher than the average of 66%).
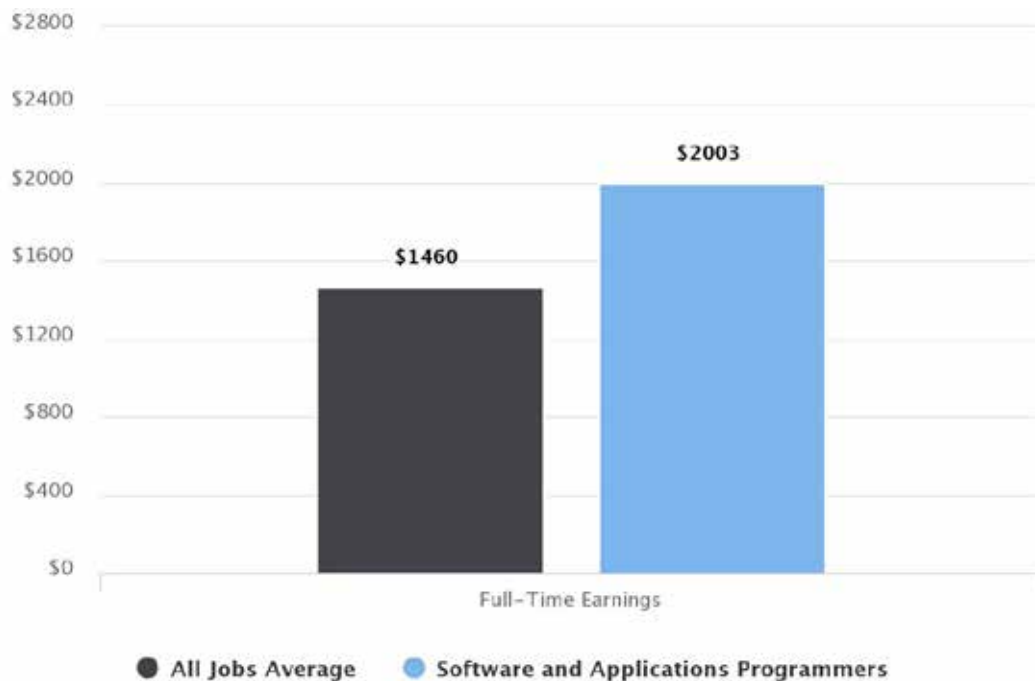

- **Hours**

Full-time workers spend around 41 hours per week at work (compared to the average of 44 hours).

Source: Australian Government Job Outlook

Source: ABS Labour Force Survey, Department of Jobs and Small Business trend data to May 2018 and Department of Jobs and Small Business projections to 2023.

Source: Based on ABS Survey of Employee Earnings and Hours (cat. no. 6306.0), May 2018, Customised Report. Median weekly total cash earnings for full-time non-managerial employees paid at the adult rate. Earnings are before tax and include amounts salary sacrificed. Earnings can vary greatly depending on the skills and experience of the worker and the demands of the role. These figures should be used as a guide only, not to determine a wage rate.

Frequently Asked Questions

What is AUPP?

Abroad Unified Pathways Program is for aspirants wishing to pursue an international degree immediately after the completion of Class 12. AUPP programs prepare students to transfer to the information technology and business management degrees, Students study for one year in India and gain credit towards admission to the second year of undergraduate degrees in Australia or New Zealand.

What is credit transfer?

Credit transfer is a process that provides students with credit for learning outcomes they already have achieved, allowing for entry into a qualification and/or provide credit towards the qualification. Credit given may reduce the time required for a student to achieve the qualification. AUPP credit transfer program provides students with credits towards programs of ATMC partner universities in Australia and New Zealand.

Is credit transfer applicable for Australia and New Zealand only?

This is a global program, which is accepted in most Asia-Pacific countries including Malaysia Singapore and China but our focus is Australia and New Zealand. These countries provide a very safe learning environment and the opportunity to receive a quality education.

What is the local AUPP centre fee?

The details of fee structure for a local education centre can be obtained from the regional AUPP audited centre (ACC). The fee is separate from the course tuition fees to be paid.

What kind of job will I get overseas?

Indian students may find employment in a range of roles in Australia or New Zealand. As students have already completed AUPP in India, their general skills of IT business managment and accounting may increase their chances of obtaining part-time employment in their area of specialisation.

Can I pay the fee in monthly instalments?

Yes, there are instalment plans available. Please ask a representative from your local AUPP centre.

How many hours per week do I need to study?

You need to allow at least 40 hours per week for study in Australia.

How does AUPP lead to study in Australia?

After successfully completing AUPP certification, students receive block credit exemptions towards entry into the second year of the various corresponding degree programs with an ATMC Academic Partner University, however it will depend on the credit evaluation of their present studies.

Do I need to pay extra at the time of visa filing?

Visa application is free of charge and supported by the best consultants who have extensive experience with Australian Government's visa processing requirements.

What are the support services in Australia and New Zealand?

ATMC has a comprehensive student services team to assistant students with advice on accommodation, retail-based training and job placement assistance.

Does AUPP have a student loan arrangement with Indian banks?

Frequently Asked Questions

Banks approve loans based on individual cases. Please contact your nearest AUPP centre representative for more information about banks offering student loans.

Will I be on par with the classmates in Australia?

The majority of AUPP students will be on par with Australian classmates. Students pursuing bachelor degrees may apply to join second year directly from institutions across Asia and the Subcontinent. This is a very common education pathway in Australia.

Can the average student cope with higher education studies in Australia?

The education system in Australia is very interactive and practical. Diligent students will be able to manage the workload and academic requirements.

What other preparations or training should a student undertake before going to Australia?

AUPP will provide all the information you need to prepare for living and studying in Australia.

Are there any scholarships available for students of AUPP?

Yes, there are merit scholarships exclusively available to AUPP students. Please contact your nearest AUPP centre representative for more information.

Can I change my subjects after arriving in Australia?

You may be able to change your course with fewer credit transfers depending on the course to which you have enrolled. You will need to contact an AUPP course co-ordinator for more information.
